# LICHTAKADEMIE BARTENBACH

## EXTRA-OCCUPATIONAL and FURTHER EDUCATION AT THE LIGHTACADEMY BARTENBACH

In the centre of light planning is always the human being and its individual desire.

The students of the UNIVERSITYCOURSE FOR LIGHTING DESIGN at the Light Academy Bartenbach are achieving practical insight into the contexts and conditions of the lighting design and learn about the influence of daylight and artificial light to the physis and psyche of human beings to measure and evaluate.

Based on these aspects real design projects are used to prepare a solution for daylight and artificial, in which high quality and energy-efficient lighting techniques are included.

With our application-oriented teaching of international standards of science and practice, students learn the influence of daylight and artificial light to the physis and psyche to measure and evaluate. They also integrate their main knowledge about architecture and design, perception of psychology, physics and technics.

All lectures for the UNIVERSITYCOURSE FOR LIGHTING DESIGN are held in German language!

## UNIVERSITYCOURSE FOR LIGHTING DESIGN at the Lightacademy Bartenbach

The UNIVERSITYCOURSE FOR LIGHTING DESIGN is an exclusively offered two-year build-study course at the Lightacademy Bartenbach in cooperation with the University of Innsbruck and the competence network light with the degree of Master of Light and Lighting (MLL).

Next start for the successfully course of study lighting design is in September 2009. This 4-semester master course is held in block courses and is qualified for extra-occupational further education.

Further information is available at the LIGHTACADEMY BARTENBACH ([www.lichtakademie.com](http://www.lichtakademie.com)); T: 0043/(0)512/3338-141.
